Supplementary Figure 1. (A) Example stimuli from each of the 32 views, organized by location and facing direction. Numbered circles refer to locations in Figure 2. Dashed line indicates the division of locations across scan runs (i.e., locations 1, 3, 6, and 8 were always presented within the same run and were never presented in the same run as locations 2, 4, 5, or 7). (B) Examples of the 17 images from one view, location 1 facing west.
